Observations of client wellbeing

| If you notice the client is acting strangely or particularly out of character it is important that you talk to them about it. Tick any of the following behaviours shown by the client. | | | |
|---|--|--|--|
| Threatening or looking for ways to hurt or kill themselves | | | |
| Talking or writing about death, dying or suicide | | | |
| Giving away possessions or saying goodbye to family and/or friends, and/or saying they have no reason for living or have no purpose in life | | | |
| Expressing feelings of hopelessness | | | |
| Rage, extreme anger or expressions of revenge against a person | | | |
| ngaging in reckless or risky behaviours | | | |
| Anxious, agitated and/or expressing feelings of being trapped, like there's no way out | | | |
| Has discussed the increased use of alcohol or other drugs | | | |
| Has discussed withdrawing from friends, family or the community | | | |
| Has discussed abnormal sleep patterns — not sleeping or not being able to sleep without waking constantly | | | |
| Dramatic changes in mood, such as sudden feelings of happiness after a long period of sadness or depression | | | |
| Would the client like assistance with the re-establishment of cultural and/or family links? | | | |
| No Yes | | | |
| If yes, complete a <i>Client referral and consent form</i> and obtain the client's verbal consent. | | | |
| Although most people show some of these signs from time to time, especially when they are tired, stressed or upset, it is better to act safely rather than not to act at all, particularly if someone is showing several of these signs at the same time. It is important to respond quickly by talking to the person and contacting the watchhouse officer to contact an ambulance for medical assistance. | | | |
