Communities – Thriving not just surviving

Welcome to the third annual Queensland community recovery forum, showcasing communities who have journeyed from disaster to resilience.

At this year's conference we are pleased to present national experts who have influenced communities to move to a new future.

We hope you take this opportunity to learn and share strategies that build community capacity and

resilience, as well as to network with business, local government representatives, non-government and government agencies involved in community recovery. Together we'll be exploring the next steps for thriving, not just surviving for Queensland communities. We hope you enjoy your time and make the most of the information and presentations offered.

Acknowledgement of the Traditional Owners

We would like to thank the Traditional Owners and respectfully acknowledge the Yuggera people of the land on which this event is taking place. We would also like to acknowledge the Elders, both past and present.
